Regarding claims 113-115, the prior arts in the record fail to disclose or make obvious to a method for routing a packet which is received from ring in-port of ring switch to at least one port of the ring switch if the packet destined for the at least local port and to ring out-port of the ring switch if the packet does not destined for the at least local port and discarding the packet if a source address of packet belong the local port of the ring switch or if ring switch ID which added, appended or prepended to the packet corresponding to the ring switch ID of the ring switch or discarding the data packet when a counter that is appended, prepended, or added to the
